? LOOKING INTO NEXT HEATING SEASON. NEW STOVE

Posted by grkrjk - 03 Jan 2013 20:56

IS ANYONE FAMILIAR WITH AVALON? WE WERE BACK HOME IN NY STATE OVER THE HOLIDAYS, AND HUBBBY WAS AT A GOLF CORSE. THEY WERE USEING A AVALON STOVE TO HEAT THE WHOLE PRO SHOP. HUBBY SAYS IT WAS AWESOME HEAT. ANY RECOMMENDATIONS? THE BIXBY WILL BE HISTORY.

Wtih them being out of business, I am assuming it will be hard to get parts etc. for this thing. I know right now you can get some, but eventually we won't be able too. We have a maxfire 115 had it since 08, Just think it will be wise to upgrade, and can't do that with Bixby.

You could buy a new 120 and most of the parts would interchange with your 115. just a though since you can buy a new one very reasonable on E-Bay 1400.00

Kd bid gets 10%, Minn gets 7.78%, then there is freight involved. gets close to 1000.00 before freight and of course E-Bay gets some. The party selling on E-bay is hoping for some profit.
