I have been selling the newstyle cables for the 110-115 that need no adapters for the last couple of years. They come with cds with 206-271 and 273. I also include written directions for making the cable work and if you have problems e-mail or use my phone number. I also include dealers manual for the Bixby stove. This cable is warrantied meaning if you can't make it work I will buy it back.

I also have the cable for the 120 and UBB on hand along with the updates for those units.

I also have used parts for the Bixby at a good savings guaranteed to work of couse.

Bixcheck 2.02 can be downloaded from here. It is hosted on this forum with the permission of JA in the form of a disguised zip file.

www.iburncorn.com/new-forum/20-bixby-ene...imit=10&start=30

Checksum information is as follows:

MD5 (Bixby115_A202_Final.exe) = 728f6cbd5a7aaf328d691dee65a45d2c

If there are difficulties downloading, see here for further instructions.
